

Backyard Poultry

Harness the nutritional power of EnterraGrubs™

SUPERIOR PERFORMANCE. SUSTAINABLY DEVELOPED.

EnterraGrubs™ are a revolutionary treat and feed ingredient for backyard poultry. Their irresistible appeal to chickens and hens, combined with the superior nutritional profile, makes EnterraGrubs™ a delicious treat that will have your feathered family begging for more!

EnterraGrubs™ are sustainably grown and processed in North America using local pre-consumer food waste. The traceable food waste contains fruits, vegetables, and grains, that would otherwise end up in the landfill.

EnterraGrubs™ have a naturally high level of calcium and an ideal calcium to phosphorus ratio that promotes strong bones, egg health, and support during molting season. As far as poultry treats go, mealworms are a good source of protein, but they can't compete with the Black Soldier Fly larvae's ideal calcium to phosphorus ratio and irresistible appeal to poultry!

EnterraGrubs™

At Enterra, our team will work with you in using our innovative insect ingredients to develop products that will exceed your customers' expectations and set you apart from your competitors. What you can expect when you work with us:

Quality

We deliver the highest quality to our customers. Our industry-leading standards and proprietary technology produce insect ingredients that will meet your expectations every time or we make it right.

Innovation

Get helpful advice from the world's top insect experts. Our knowledgeable team will provide technical and marketing support to help you get the most out of new products and achieve success.

Sustainability

Satisfy customers who want sustainable solutions. Our renewable insect ingredients have less impact on the environment than existing alternatives, helping to feed and care for the world more responsibly.

Differentiate yourself with EnterraGrubs™

EnterraGrubs™ are whole, dried Black Soldier Fly larvae that are full of good nutrients.

Insects are a staple and natural component of the diets in foraging birds like chickens, turkeys and ducks. EnterraGrubs™ are an excellent source of nutrients for backyard poultry. The high calcium and protein levels help with strong bones, and aid in the strengthening of eggshells. Their natural levels of lauric acid and highly digestible proteins will help keep birds healthy during molting.

To ensure that our products adhere to the high quality and safety standards specified in CFIA, FDA and EU regulatory regimes, production lots are routinely analyzed for heavy metals, mycotoxins, PCBs, dioxins, E.coli, Salmonella and total microbial load.

EnterraGrubs™ Proximate:

Crude Protein (%): ~34-40

Crude Fat (%): ~40

Crude Fiber (%): ~11

Ash (%): ~5

Moisture (%): ~6

Calcium (ppm): ~8000

Phosphorus (ppm): ~6000

Energy: 450-500 Cal/100g

Intended Use:

A natural source of protein and fat for feeding backyard chickens.

Why EnterraGrubs™ for Backyard Poultry:

High-Quality Product

- Three regulatory agencies involved in the inspection and approval process (CFIA, FDA, AAFCO).
- Regularly tested for microbes and toxins.

Nutritionally Superior Food Source

- 20x more calcium than mealworms, leading to stronger eggshells.
- Calcium to phosphorus ratio at or above the recommended 2:1 for birds (Black Soldier Fly larvae have natural ratio of 1.5 to 2.5:1 vs. 0.12:1 for mealworm).
- Contains lauric acid (medium-chain fatty acid) with antimicrobial benefits.
- Excellent well-balanced amino acid profile.

Birds and Their Owners Love Them

- Backyard chicken, turkey and duck producers describe Black Soldier Fly larvae as "Candy for My Birds."
- Pleasant smell and taste make for feeding frenzy when Black Soldier Fly larvae are delivered to the flock.

Reliably Sourced

- Produced in North America and sustainably developed.
- Reliable shipments and less expensive transportation costs.
- No tariffs or political pressures.
